America's #1 Academic Success Coach

# There's a proven system for your students to: STAY IN SCHOOL, PAY FOR SCHOOL, AND ENJOY SCHOOL.

Dear Friend,

Have you ever considered that your students' present day academic success or lack thereof is directly related to their 1) foreknowledge of the "academic formula", 2) chosen college major? (the right or the wrong major) or 3) the result of life challenges, obstacles and mental setbacks that they never ever overcame? (You know the ones that quietly tell them they can't, they won't, you'll never?)

**SO...have you ever considered that you may hold the answers to their problems?**

Well out of the 100% of students that enter college, only 70% return for their second year. 50% of those who return for year two will actually graduate in 5 years or less. From those that graduate, only about 33% of them will land a job working in their career. But this can be changed today!

**I'm your answer.**

I literally grieve and cry, when I see and hear good students underachieve, under accomplish, and stay bound under challenges and adversity; never reaching their life's potential and promise. **I speak because, at one time I was this kind of student.**

You see, I was born with 7.25 fingers and grew up full of insecurities. My 7.25 fingers caused me to feel inadequate, insignificant, unworthy, and operate as a complete "Loser". The turning point in my life was when I finally realized what my mentors, my coaches, my educators and my parents were saying all the time; "Kantis you are a winner! You are great! Kantis you can be, do, and have whatever you want out of life!" As a result, I learned how to embrace my personal uniqueness and learned and mastered the secret formula that can impact your students' grades, mindset and college career.

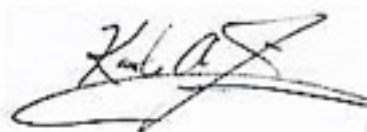

Understanding the "System" I was able to go from very low S.A.T scores to receiving three advanced scientific college degrees and more than \$300,000 in scholarship money and become a top research scientist for 10 years.

From college admissions to commencement, I can help your students with a practical game plan to achieve their goals and your event goals. My proven system works! The students on your campus will:

- **Get better grades**
- **Graduate on time**
